

PROTECTOR PLUS™

Model RT504
FCC Approved

WIRELESS SIXTEEN PLUS™ REMOTE CONTROL

For use with the **PROTECTOR PLUS (SS5400)**
SUPERVISED HOME SECURITY SYSTEM
or **RR501 Transceiver/Appliance Module**

- Controls up to 16 lights and appliances remotely
- Dims and brightens lights connected to Lamp Modules and Wall Switch Modules
- Requires 4 AAA alkaline batteries (not included)

INSTALLATION AND OPERATING INSTRUCTIONS

1. Install 4 "AAA" alkaline batteries (not included) into Remote Control's battery compartment.
2. Using a dime, set Housecode dial on Remote Control to same letter as Base Receiver (BR521) or Transceiver/Module (RR501).
3. If using the RR501, set Remote Control's "bank switch" to same position as bank switch on RR501, either 1-8 or 9-16. The BR521 does not have a bank switch; it lets you control 16 Modules directly using the bank switch on the Sixteen Plus remote Control.
4. If you set the bank switch to 9-16, you can flip the "finder label" over to show that the rocker keys represent 9-16 instead of 1-8.
5. Press button 1 - ON or 1 - OFF (or 9 - ON/9 - OFF) to turn RR501 Transceiver/Module on or off.
6. Press buttons 1 thru 8 (or 9 thru 16) to control other X-10 Modules in your system.
7. To dim or brighten lights connected to Lamp Modules or Wall Switch Modules: press and release number button for Module to be controlled, then press \vee to dim light or \wedge to brighten light.

Note: You cannot dim or brighten lights plugged into the RR501 Transceiver/Module as this Module acts like an Appliance Module.
